PMI Certifications to Support Your Career

Certified Associate in Project Management

CAPM® certification demonstrates your understanding of the fundamental knowledge, terminology, and processes of effective project management..

Project Management Professional

PMP® certification is the gold standard in project management. Recognized by organizations worldwide, the PMP validates your competence to perform in the role of a project manager, leading and directing projects and teams.

Agile Certified Professional

Demonstrates ability to define small portion of functionality and guide a small team to deliver product release in time-boxed increments.   Address multiple methodologies and roles: Scrum Master, Product Owner, and Team Member.
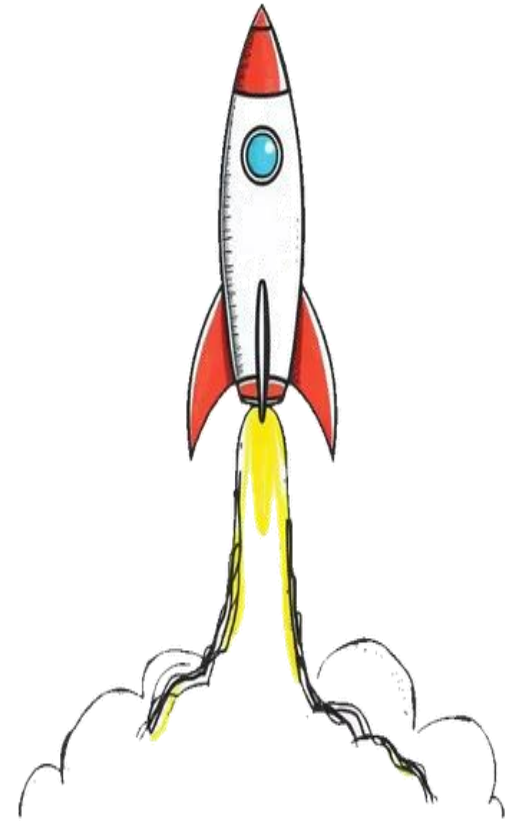

Professional Business Analysis

Able to provide tactical skills to a strategic intent. Uses variety of thinking skills in order to capture "current state" and develop vision for a "future state" and provide a roadmap on how to get from one to the other.

CPMAI - Cognitive Project Management for Artificial Intelligence

Equips professionals with a structured methodology for managing AI projects. It emphasizes business understanding, data readiness, and iterative development aligned with proven AI project lifecycles. Ideal for agile practitioners, project managers, and business analysts.
